Name of the Student : Jesil Josep, Madras Veterinary college, Chennai - 07.

E-mail - jesilmj@gmail.com

Category of the success story/case study: 1 A. Students visited abroad for International training

I am Jesil Josep and It was really a wonderful opportunity for us to visit Oklahoma State university. We got amazing experience over there and.we learned about different clinical practices practiced in United States. I attended seven wards in the veterinary teaching hospital.viz., Opthalmology ,equine medicine, small animal surgery ,zoo and exotics, internal medicine and community practice. I have learned about diagnostic procedures and treatment protocol practiced over there. The accommodation and other supports from the University was so nice.we also got lecture notes and our doubts were cleared by the professors.

In Opthalmology ward I learned about different diagnostic and treatment protocols which was informative and new for me.In equine section, I learned about different diagnostic procedures of disesase affecting them and also how to treat it. In anaesthesia department I learned about different drugs using for anaesthesia , maintenance and preparation of animal for surgery. In surgery department Ilearned about different surgery protocols,post operative management and diagnosis of condition.

Zoo and exotic was so exciting where I learned about different diagnostic methods, handling and diagnosis of conditions affecting wild animals. We visited Tulsa Zoo and got more information regarding zoo management , handling Iin community practice I learned about different vaccination and dental issues affecting pet animals. In Oklahoma we had an opportunity to attend different seminars and symposium which was a great opportunity for us. I also went to Langston University and learned about intrauterine insemination in goats and also learned laproscopic AI in ruminants. The two months training program was so useful learned about culture and also scientific research over there, development of diagnosis and therapeutics .It was really remarkable opportunity. We got a good opportunity to Know what was happening on developed countries there scientific improvement and how we can apply it on India.

The facility in United States was without any discrimination and they treated us as equally like their students and gave us knowledge and also training ,the accommodation and food arrangement also nice. it was an informative visit and what we learned over there needs to be applied over here for the development of our nation.

Title: Externship clinical training programme , College of Veterinary Medicine, Oklahoma state University.
